THE RETAIL INTELLIGENCE COMPANY

# Retail is Changing

82% of retail is still done in the store

There's more pressure on retailers than ever before:

- UK high street store closure rate of 14 per day in 2018 and store vacancy rate at 9.9%
- Retail footfall declines for the 15<sup>th</sup> consecutive month
- Online growth is falling short of last year's double digits

# We're living a Digital Revolution

“a customer-data-driven  
enterprise is about  
empowering employees...”

Forbes

# EXPERIENCES DRIVEN COMPANIES ARE THRIVING

The world's leading **ecommerce** platform opening 3,000 brick and mortar stores by 2021

35% of what the subscribers watch is based on an AI recommendation

The world's largest consumer electronics company is a music retailer

**DATA SCIENCE IS A KEY ASSET IN THEIR BUSINESS OPERATIONS**

# Next Generation Retailing

Seeplus is our powerful SaaS Retail Data Science Performance platform, accessed via business applications and delivered via smart wearable devices

- ✓ SALES & VISITORS FORECAST
- ✓ WEATHER, SOCIAL & SPORTS IMPACTS
- ✓ PROMOTIONAL IMPACTS
- ✓ UP SELL OPPORTUNITIES
- ✓ STAFF OPTIMIZATION
- ✓ CUSTOMER CHURN

# ADVANCED FORECASTING

Using Data cleansed by the Business Rules filter Engine, our Advanced Forecasting app consists on a predictive intelligence software, hosting multiple advanced analysis algorithms designed to model data for **actionable business** usage.

## Key Benefits

- ✓ Better definition of Intra Day Employee Targets
- ✓ Accurately forecast promotional, weather and calendar impacts
- ✓ Better Staff Optimization
- ✓ Better understanding of the business future

# CUSTOMER CHURN

Being aware that it is far less expensive to retain existing customers than to acquire new ones, **knowledge of a certain customer churn probability** turned into a critical business insight. It is this understanding that enables companies to act on the subject, through immediate and measurable marketing actions.

## Key Benefits

- ✓ Weekly/Monthly track the customer churn probability
- ✓ Become pro-active to retain customers
- ✓ Create targeted campaigns
- ✓ Better understanding of customers behavior
